“Precision in series” - a synonym for a specialised range of four Shaking Water Baths that are in use all over the world.
Quality built on Tradition

Users in research labs, standard and special labs for medicine, science and industry throughout the world have been profiting from the precision and dependability of our products for more than 45 years, all of which comply with valid European standards and bear the CE mark.

In the future, the success of a product spectrum of laboratory devices that meet the toughest demands on material, functioning and design will continue to be ensured by experience of every-day use in detail, ongoing technical advances and an excellent quality approach.

The phrase „Quality built on Tradition“ encompasses more than just the sum of impressive product innovations. It is also an expression of our corporate policy, which includes a high degree of ready-and-waiting service as our primary customer-friendly service goal.

This applies to all of the GFL laboratory products that are produced exclusively at our plant in Germany - Deep Freezers, Shakers, Incubators, Water Stills, Water Baths or Shaking Water Baths alike.

Secure future

A vested quality demand in accordance with international standards is documented for all GFL laboratory products with the certification to DIN EN ISO 9001:2008, promoting more trust in the permanent high quality level of our products.

In addition to the continuous optimisation of ongoing production processes, the ISO obligation also calls for the commitment to quality awareness of our employees and the continuous development and rapid implementation of preventive measures to ensure quality assurance at a high level.
The product range of GFL Shaking Water Baths comprises four models, all of them specialised in different work processes. Models 1083 / 1086 are designed for reciprocating motions, model 1092 for orbital motions. Shaking Water Bath 1070, with the patented brand name THERMOLAB®, has four individually heatable basins and satisfies the most sophisticated demands, too. GFL Shaking Water Baths are in use all over the world. They are regarded as highly reliable, with a superb performance and they are maintenance-free. All units carry the CE mark.

The accessories to accommodate a variety of vessels can be easily and safely fixed in their shaking devices. The accessories shown in this brochure are not part of the standard scope of supply. The right of constructional modifications is reserved. Special makes are possible.

**Accessories**

Page 7
Shaking Water Baths by GFL are untiring

**Precision in series**

GFL Shaking Water Baths are regarded as untiring all-purpose experts. Our product range is designed for precise heating-up processes and, simultaneously, gentle mixing or vigorous shaking. Models 1083, 1086 (with reciprocating motion) and 1092 (with orbital motion) are equipped with digital display of temperature and, according to the specifications, with digital display of shaking frequency and a cooling coil.

### Technical Data

**Temperature range:**
- approx. 5 °C above ambient to +99.9 °C
- with water level regulator 1919: approx. 3 °C above tap water temperature to +99.9 °C

**Temperature constancy (temporal):** ±0,1 °C

**Shaking motion:** reciprocating, with on / off switch

**Shaking amplitude:** 22 mm

**Exterior dimensions (W x D x H):** 715 x 520 x 330 mm

**Net / gross weight:** 28 / 32 kg

**Packing volume:** approx. 0.29 m³

### Order No. 1083

**Specifications and Features**

- Microprocessor-controlled temperature regulation ensures fast heating up to the set temperature and an excellent temperature constancy: ±0.1 °C, temporal
- Optimum temperature distribution throughout the whole bath interior
- Temperature display and setting digitally via LED display, in 0.1 °C increments. Fast and exact setting, exact reproducibility of the preset temperature
- Electronic monitoring of the temperature controller. In case of a fault, the cause is displayed on the LED.
- Over-temperature cut-out: electronic, 4 °C above set temperature, and electro-mechanical > 130 °C
- Constant shaking frequency, independent of load, even when in continuous operation
- Maintenance-free and durable shaking device, electronically controlled and continuously settable shaking motion, gentle start-up. In models 1083 and 1086, the shaking device is guided on corrosion-resistant special ball bearings.
- Easily removable shaking rack
- Bath interior and shaking rack made of stainless steel
- No dripping back of condensate into the vessels due to double-walled insulating lid with interior camber
- Drain cock to empty the bath

### Applications

Whenever exactly reproducible temperatures are required for shaking tasks, our Shaking Water Baths are used by standard and research laboratories. Their scope of applications comprises incubations, fermentations, homogenisations, chemical and biochemical reactions, enzyme and tissue studies.
**1092**

Technical Data

Temperature range:
- approx. 5 °C above ambient to +80 °C
- with water level regulator 1919: approx. 3 °C above tap water temperature to +80 °C

Temperature range: +10 °C to +80 °C

Cooling coil: built-in as standard, for connection to the water mains or to an external recirculating chiller

Temperature constancy (temporal): ±0,1 °C

Shaking motion: orbital, with on / off switch

Shaking amplitude: 14 mm

Shaking frequency display: digital-LED

Exterior dimensions (W x D x H): 635 x 505 x 400 mm

Net / gross weight: 35 / 40 kg

Packing volume: approx. 0.34 m³

**Order No. 1092**

---

**1086**

Technical Data

Temperature range:
- approx. 5 °C above ambient to +99.9 °C
- with water level regulator 1919: approx. 3 °C above tap water temperature to +99.9 °C

Temperature range: +10 °C to +99.9 °C

Cooling coil: built-in as standard, for connection to the water mains or to an external recirculating chiller

Temperature constancy (temporal): ±0,1 °C

Shaking motion: reciprocating, with on / off switch

Shaking amplitude: 22 mm

Shaking frequency display: digital-LED

Exterior dimensions (W x D x H): 715 x 520 x 330 mm

Net / gross weight: 30 / 34 kg

Packing volume: approx. 0.29 m³

**Order No. 1086**

---

Additional technical data of models 1083 / 1086 / 1092

Interior dimensions (W x D x H): 450 x 300 x 160 mm

Volume of bath interior: approx. 20 litres

Working height (incl. lid): 190 mm

Max. water level above shaking cage / tray: 105 mm / 90 mm

Shaking frequency: from 10 - 250 rpm

Over-temperature cut-out: electronic, 4 °C above set temperature, and electro-mechanical > 130 °C

Housing: corrosion-resistant, made of electrolytically galvanised sheet steel, powder-coated

Electrical connection: 230 V / 50...60 Hz / 1.5 kW *

* Other voltages on request
Individual and special

THERMOLAB®, a quadrothermal Shaking Water Bath with reciprocating motion, possesses an exceptional individuality in the market. It disposes of four separate basins in which different sample vessels can be heated independently of each other, or which four different users can use at the same time - saving both working space and time.

Technical Data

- Temperature range: approx. 5 °C above ambient to 99.9 °C
- Temperature setting and display: digital-LED
- Over-temperature cut-out: electronic 4 °C above set temperature, and electro-mechanical > 130 °C
- Shaking motion: reciprocating, with on / off switch
- Shaking frequency: from 2 - 50 rpm
- Shaking amplitude: 22 mm
- Working height: 80 mm
- Sample holders, height-adjustable: 32 mm
- Dimensions sample holders: 128 x 128 mm
- Interior dimensions (W x D x H) per basin: 175 x 175 x 100 mm
- Exterior dimensions (W x D x H): 625 x 556 x 270 mm
- Electrical connection: 230 V / 50...60 Hz / 1.3 kW
- Net / gross weight: 28 / 36 kg
- Packing volume: approx. 0.34 m³

Order No. 1070

Specifications and Features

- Microprocessor-controlled temperature regulation ensures fast heating up to the individually set temperature and an excellent temperature constancy: ±0.1 °C temporal
- Electronic monitoring of the temperature controller. In case of a fault, the cause is displayed on the LED.
- Bath interior and shaking rack are made of stainless steel
- Maintenance-free and durable shaking device, electronically controlled and continuously settable shaking motion, gentle start-up.
- With the use of optional racks or directly on the sample holders, all kinds of vessels from µl to ml used in laboratories, microtiter plates, cycler tubes, Western Blot vessels, centrifuge tubes, ampoules and bottles can be fixed.

Applications

THERMOLAB® is universally applicable in standard, research and specialised laboratories; for example for all temperature-dependent reactions, for incubations of reagents and solutions, Enzyme-Immuno-Essays, Western-Blots, Reverse Dot Blots, for hybridisations at four different temperatures, for stringent washing processes with variable temperatures, Restriction Enzyme Digestions, Proteinase-K Digestions, DNA Elution, T 7 Sequenase Sequencing, for thawing processes and incubations of cultures or for polymerase chain reactions (PCR).
### Accessories

**Shaking Water Baths 1083 / 1086 / 1092**

**Shaking Tray**
- Made of stainless steel, with holes to accept clamps for Erlenmeyer flasks and other accessories. The tray has two handles that reach above the water’s surface, for easy inserting and removing from the bath.

**Order No. 1910** for 1 bottle / Contents 200 ml
**Order No. 1911** for 3 bottles / Contents 3 x 200 ml
**Order No. 1912** for 6 bottles / Contents 6 x 200 ml

Highly efficient: only 4 ml per litre of water. A necessary change of water is indicated by fading of the blue colouration.

3 Packing units:
- **Order No. 1910** for 1 bottle / Contents 200 ml
- **Order No. 1911** for 3 bottles / Contents 3 x 200 ml
- **Order No. 1912** for 6 bottles / Contents 6 x 200 ml
